It is recommended that you **always read the warnings** & instructions on the pack.

Kassel Candles are handmade using a blend of Europe's highest quality waxes (including a percentage of pure beeswax) and natural fragrances, with real fruit and botanicals sourced from around the world. The wick is made from 100% cotton for excellent burning and fragrance diffusion. As the candles are made from real products they emit a beautiful fragrance even when they are not lit. All candles are self extinguishing and dripless when burnt according to the manufacturers requirements.

1. NATUREGLOW CANDLES

Kassel's NatureGlow candles combine the finest flowers, dried fruits and spices as decoration, with a blend of quality waxes that enable exquisite burning radiating with a warm glow and delicate aroma. The inner core of wax is soft and fragranced while the outer layer (containing the inclusion) is hard wax that will not burn or melt when the candle is used correctly.

NatureGlow candles are available in a variety of decorations and fragrances.

The NatureGlow series creates a 3 dimensional effect... this has been achieved by a special technique of dipping the outer layer of wax partly exposing the real botanical or fruit within the outer layer.

Styles: - KC12 – 30 hours burning
KC10 – 60 hours burning
KC11 – 100 hours burning

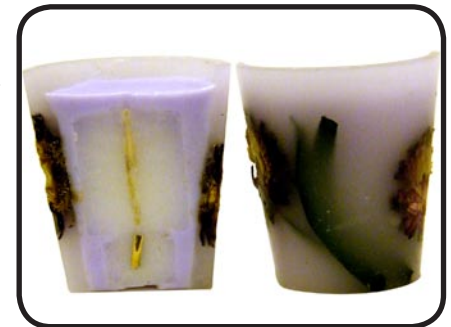

2. ULTRAGLOW CANDLES

Similar to the NatureGlow candles. The UltraGlow series also combines the finest flowers, dried fruits and spices as decoration with a blend of quality waxes that enable exquisite burning radiating with a warm glow and delicate aroma. The inner core of wax is soft and fragranced while the outer layer (containing the inclusion) is hard wax that will not burn or melt when the candle is used correctly.

Again, the UltraGlow candles are available in a variety of decorations and fragrances.

The UltraGlow candle has the inclusion fully embedded in the outer-most layer of the wax resulting in a smooth external surface.

Styles: - KC21 – 30 hours burning
KC14 – 60 hours burning
KC09 – 70 hours burning

3. AQUAGEL CANDLES

AquaGel candles use the highest quality gel wax. These magical candles offer clean, safe, smokeless burning while illuminating the fruit, flowers and spices from within. The AquaGel Collection features sophisticated glass containers with lids which protect the gel from dust and fingerprints and are held in place by decorative brass clips. Their lids double as protection for the candle surface in the store and as a saucer to place the candle upon during illumination. Interior glass cup secures and protects decorations so candle can safely burn to the bottom of the container.

Highest quality European gel wax and 100% cotton wicks are used in the manufacturing of these exquisite candles. The Aqua Candle burns for 40 hours with the original gel wax. Once the gel wax is completely consumed, the glass container can be used with tea lights as a hurricane lamp or it can be thoroughly cleaned from its contents and used as a decorative container.

Styles: - KC27 – 40 hours burning
